

■ Lubrication

Please refer to Table 1.

Lubrication is classified into three groups in the Table 1.

For maximum operation efficiency and prolonged life, lubricate chain couplings with a non-corrosive, non-separating grease of medium consistency.

Table 1 Periodical lubrication and relubrication

Unit : hours

Type of Lubrication	Periodical Lubrication Standard - Coupling without Case -	Relubrication Standard Period - Coupling with Case -	
		1st Relubrication	2nd Relubrication
I	once a month	3,000	4,000
II	once a week	2,000	3,000
III	case is used	1,000	2,000

Table 2 Volume of grease

Unit : Kgs.

Coupling No.	Volume	Coupling No.	Volume
CC 3012	0.05	CC 6018	0.42
CC 4012	0.08	CC 6022	0.60
CC 4014	0.10	CC 8018	0.80
CC 4016	0.13	CC 10020	1.20
CC 5014	0.19	CC 10020	1.80
CC 5016	0.25	CC 12018	2.50
CC 5018	0.30	CC 12022	4.00
