

CT TYPE CLIP TOP CHAIN

Plastic tops are snapped on extended pins of chain. The chain is enclosed with plastic tops. As there is no opening on plastic tops, it makes foreign objects difficult to go into between plastic tops.

Clip top chain is well suitable for applications where the strength of steel chain and the smooth surface of plastic are required, making it possible to convey heavy loads and prevent materials to be conveyed from damaging.

Carbon steel chain : CT-30-A

Nickel plated carbon steel chain : CT40N-U

Stainless steel chain (SUS304) : CT40SUS-E

Selflube steel chain : CT60SER-A

Type of plastic top :

A : Polyacetal (White) for general conveyance

U : Polyurethane (semi transparent) for slip-resistant conveyance

E : Electro conductive polyamide for preventing materials to be conveyed from electrification.

Usable temperature : -10°C to 70°C

(Polyurethane : -10°C to 50°C)

Max chain speed : 30m/min.

(Recommend : 15m/min and slower)

Minimum number of teeth of sprockets : 13

UNIT:mm

If chain may interfere with the hub of sprockets, "C" dimension should be as shown above.
